

# Easy Paper Airplane Directions

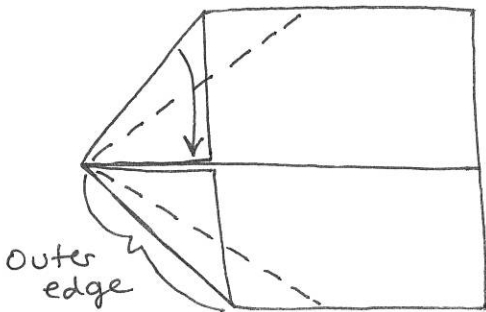

drawn by Allison Harrell

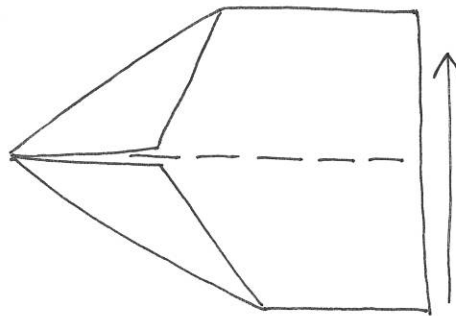

1. Fold an 8.5x11 sheet of computer paper in half longwise (hot dog style) Then unfold

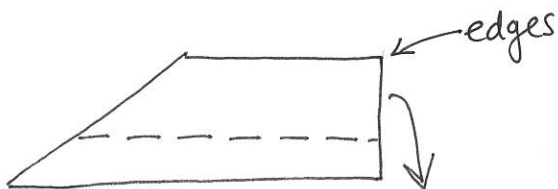

2. Fold the corners of one side to the center line. The top edge should be flush with the center line.

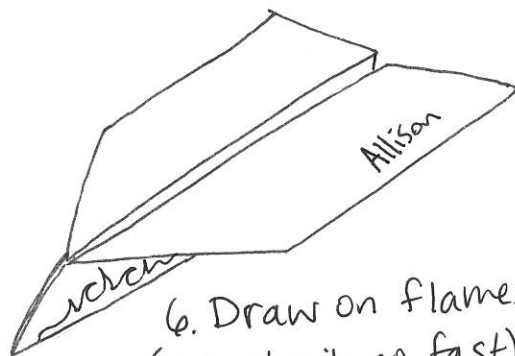

3. Repeat the process of Step 2, folding the newly created edges to the center line

4. Fold the plane in half (using the fold created in step 1)

5. Fold down wings (You can align the edges of the two wings to make them symmetrical)

6. Draw on flames (to make it go fast) and write your name (to prove it's yours)  
TA-DA! Finished plane!
